

Low Voltage Systems Technician Temporary Job Posting

Roger Williams Park Zoo (RWPZ) of Providence, Rhode Island, is one of the nation's oldest zoos, exhibiting over 100 animal species. Our culture is built on our core values -community, fun, innovation, diversity, integrity, sustainability, and excellence. We value our role in the community as a treasured place for families and a trusted resource for learning; we create a sense of community for our staff and contribute to the global conservation community. We provide a fun experience for our guests and believe that a fun environment is essential to create a great workplace. We are willing to take risks, to propose novel ideas and to think "out of the box". Bold dreams are welcome here. We act with respect toward all. We value diversity and are intolerant of bias. Integrity and honesty drive our business practices and our relationships with each other and our constituents. We are driven by our vision of greater sustainability in our environmental practices and in our business model. We believe that by establishing a sustainable financial base we can best achieve our goals. We are always striving for excellence. We work to exceed expectations in all areas.

RWPZ is currently recruiting a full-time, temporary, non-exempt Low Voltage Systems Technician. Under the direct supervision of the Lead Low Voltage Systems Technician, the temporary Low Voltage Systems Technician is responsible for pre-wiring, installing, programming, and maintenance of products and services ordered for structures under construction prior to and after the placement of walls/ceilings. In addition, they are also responsible for pre-wiring, installing, programming, and maintenance of existing structures for security systems, fire alarms, telephones, cable television, CCTV, intercom systems, phone & cable jacks, control panels, speakers, antennas, VoIP Systems, security control boxes/panels, keypads, low voltage lighting, voice-activated systems, and audio/video systems. The individual in this position will also be responsible for the setup, breakdown, inventory and repair of all Auto/Visual equipment.

Responsibilities:

- Install, move, and modify CCTV, telecommunications and related equipment, according to job order specifications, standards, and procedures.
- Diagnose equipment malfunctions.

- Repair voice and data equipment.
- Maintain and repair telecommunications systems and equipment according to manufacturer recommendations and specifications.
- Install electrical and mechanical control mechanisms, structured wiring and audio visual and video data voice equipment, audio and video equipment, fire and intrusion alarm systems, Card Access, PA, and intercom, VoIP, Emergency Call Box Systems.
- Maintain and repair any gate/door electrical and/or mechanical malfunctions.
- Report and monitor service order changes.
- Promote workplace safety in the use and maintenance of electrical equipment and supplies.
- Maintain and report accurate records of hours and materials used.
- Provide support and perform additional functions as directed by the Lead Low-Voltage Technician and/or the Facility Director.
- Assist in the implementation and documentation of electrical safety protocols.
- Provide assistance in snow removal on sidewalks, pathways and exhibits.

Required Experience, Training and/or Education

Associate in Science Degree in Electrical Technology or Computers Technology or an equivalent combination of education and experience.

Preferred Experience and Education:

A minimum of one-year prior work experience involving setting up, installing and troubleshooting audio and other low voltage systems; or an equivalent combination of education and experience. Recent experience working with diverse populations and fluency in speaking additional languages a plus.

Competencies

- Strong knowledge of electrical theory, industrial motor controls and circuits.
- Familiarity with programming and installation of programmable logic controls, transformers, and A/C drives.
- Experience with and knowledge of electrical code requirements, commercial and industrial wiring and applicable safety protocols is preferred.
- Highly organized and able to work with fundamental supervision.
- Proficiency in:
 - pulling a variety of wires such as Cat5E, Fiber, RG6, RG59 and terminating both male/female RJ11, RJ45, F, BNC, and compression fittings.
 - Word, Excel Outlook, and Visio.
- Demonstrated success in the ability to:
 - read/write PCB Schematics, Flow charts, Logic Ladders, and Floor Plans.
 - communicate effectively, both verbally and written.
 - work in a high public contact area.
 - utilize standard hand and power tools, measuring devices, testing equipment.
 - work with Multi-meters, Toners, CCTV Testers, Cable Testers, and Punch-Down Tools.

Additional Requirements

- Successful completion of a background check.
- Valid driver's license.
- Willingness to work a flexible schedule, including occasional evenings, weekends and holidays.
- Ability to work outdoors under various weather conditions as well as one weekend day per workweek, occasional holidays and at after-hours special events.
- The individual in this position is considered essential staff and required to report to work during inclement weather, and electrical and zoo emergency situations unless otherwise notified by the Lead Low Voltage Technician and Facility Director.
- Frequently required to stand, carry, walk, drive, kneel, crawl, climb stairs and ladders, squat, bend and stoop for prolonged periods of time.
- During snowstorms, the individual in this position may be required to operate a snow blower and/or snowplow.
- Occasionally lifts and/or moves objects up to 50 pounds.
- This position often requires the employee to work in confined spaces and climb a ladder to a maximum height of 40 feet.

Supervisory Responsibilities:

- Not Applicable
